

As you are all aware, Breckinridge County Schools implemented a new system where students were issued a badge to scan when they got on and off the bus. This allowed us unprecedented information in real time as to what bus students were riding.

We are excited to announce that during the 2021-2022 school year we'll be rolling out an app that will allow you to see the times and locations where your child scanned on or off a bus. For this to be successful, it is essential that all students have their badge on their person each school day. Also, we will be implementing a system where a QR code will be attached to their badge that allows them to scan when logging into a Chromebook instead of typing their username and password.

The badge your child was given can be reused each school year so please store it in a location over the summer where it can be easily found when school starts in August.

If your child does not have their badge, please fill out the form below so a replacement can be issued.
